Scholarships for PhD students

in the IRTG Semantic Integration of Geospatial Information http://irtg-sigi.uni-muenster.de/
**********************************************************
```

The International Research Training Group "Semantic Integration of Geospatial Information"
is offering several scholarships for doctoral researchers at the University of Bremen and the University of Münster,
Germany, starting in 2010.

RESEARCH GOALS

To develop methods and tools that support:

- Semantic modeling, using methods from the application disciplines, computing sciences, engineering, cognitive sciences,
linguistics, mathematics, and philosophy;

- Information discovery, evaluation and access, using computational, human-computer interaction, database and information
retrieval approaches;

- Semantic translation, using category-theoretical formalizations as well as linguistic, computational, and human
computer interaction approaches;

- Service composition in application domains, using computational, cognitive and human-computer interaction methods.

PARTNERS

University of Muenster, Germany
University of Bremen, Germany
University at Buffalo, USA

IMPORTANT DATES

Deadline for applications: February 28th, 2010 Pre-selection of applications, notification of applicants, invitation to
the selection workshop: March 1st - March 8th Selection workshop: April 7th
